RJE International launches new and improved DPR-275 Diver Pinger Receiver

Irvine, CA July 20th 2016 - RJE International, a specialist in mission critical products re-launched an all new and improved DPR-275 Diver Pinger Receiver and PRS-275 Pinger Receiver System.

The portable hand-held DPR-275 is a durable acoustic receiver with a wide span of frequency with both visual and audio, capable of detecting and locating an underwater sound source emitting a signal in the 5-80 kHz range. The durable DPR-275 has an improved LED display readout for greater visibility in poor conditions, and a rechargeable 9-volt lithium-ion battery that has a longer life and is easier to change. We also added an enlarged compass for convenient navigation, and a more rugged water-tight carrying case.

VP of Sales, Bruce O'Bannon stated "Our new DPR-275 is a creative blend of continual improvements with our R&D, and working with key accounts to deliver superior product for their critical needs. The DPR-275 is sleeker with upgraded stylings and increased functionality that effectively delivers under the most rigorous constraints and environments."

The DPR-275 receiver assembly operates to a depth up to 200 meters (650 feet) and possesses a slight positive buoyancy. The receiver housing is constructed of black Acetal resin and hard anodized T6 aluminum, and will withstand prolonged exposure to salt water.
