*Specifications are subject to change without notice*

- ◆ **Designed for inflatables**
- ◆ **Easy to read compass**
- ◆ **Adjustable chem-light**
- ◆ **Used by military forces worldwide**

The **BNC-100G** Series Boat Navigation Console ensures accurate navigation of small inflatables in tactical combat situations when accuracy is essential. Used by Special Boat Commands worldwide, the console is designed for easy installation on the air compartment of small inflatables like the WING P4 and P5 series boats or the Zodiac F470. Mounting slots allow for reliable tie-down points utilizing tiewraps, 550 cord, or bungee straps. The BNC-100G replaces the knot-meter and instrument hood of the original BNC-100 with rugged rubber straps to hold a small GPS receiver (not included). This provides the operator clear access to the GPS receiver, even in rough seas.

The navigation compass uses a black compass card with luminous markings to facilitate night navigation. Accuracy in rough seas is ensured by a jeweled bezel movement in the compass. The BNC-100G comes complete in an easy to store carrying bag.
